Kristie's Cakes

All of these cakes are fun shaped sculpted cakes - no pans for these types of cakes! Yes, it really is a tooth! This one was for a dentist who specializes in dental implants. It was carved and covered with white fondant. The threaded base is made with strips of fondant and then airbrushed silver to look like titanium. The "boombox" is made from layers of a sheet cake, cut and stacked on top of each other. This cake was covered in fondant with fun cutout fondant details. The handle was made from fondant with Tylose added (1 tsp per pound of fondant). The addition of tylose allows the fondant to dry harder. The handle was made days in advance so that it

would be dry. The elephant is a great example of a shaped cake made from cupcakes. Look closely and you will see the bases of the cupcakes. The possibilities are endless for 2-D shapes made from cupcakes. The space shuttle on the space cake is a small sculpted cake that was placed onto a sheetcake to give more of a 3-D look. The piggy is such a popular baby shower or 1st birthday cake. It is made from a combination of cakes baked in different size stainless bowls and some pieces cut from a sheet cake. The great fondant bow tops off this cute piggy. The half-pipe cake was made for a skateboarding fanatic. We covered the sides with graffiti type skateboarding edible images. It was carved from a sheet cake stacked three layers high.

Enjoy looking at the cakes. Kristie is making more cakes right now - so there will be new cakes to look at next month. Kristie's cakes are really popular. Plan in advance - be sure to place your order 2 weeks in advance.
