Edible Frosting Sheet Ideas

Edible frosting sheets are a fun and easy way to decorate your cakes. There are pre-printed frosting sheets, also called Edible Images for many licensed characters or we can print frosting sheets of non-licensed or trademarked pictures or images. We also have access to a clipart gallery that provides thousands of images that we can print. Here are some ideas for frosting sheets.

Create a "magazine" cover to use on a cake. Just have a great picture and then use your imagination to create the rest around the picture.

A picture is worth a thousand words... Imagine the oohs and aahs of the team members when they see their pictures on the cake!

Sponge Bob, Disney Princesses, Barbie, Justice League and Hello Kitty just to name a few. We carry Edible Images for many licensed characters. You can decorate around the Edible Image and coordinate colors to expand the theme.

Even a child can get into the decorating act. Edible markers can be used to draw on the frosting sheet and then place it on the cake.

This is a photo cookie! The cookie is iced with a layer of royal icing. The picture placed in the center and then dipped into sprinkles. The sprinkles form the frame around the picture. This is a great idea for graduations, wedding favors, business logos.

We also have blank frosting sheets.

You can use them to draw or decorate on the frosting sheet instead of directly on the cake

- you can do this decorating ahead of time
- you can use an airbrush, edible markers or dusting powder paints to create your design
- if you make a mistake it is better to make it on the sheet rather than on the cake!
