Product Highlights

Edible images can be a great way to make decorating easy, and maintain a very polished look to your work. Edible images are pictures or drawings that are printed on special paper, using edible inks that can then be placed on top of an iced cake. There are 2 types of edible paper, rice paper and frosting sheets. Rice paper, also called wafer paper, is an edible starch, sugar-free paper. This paper is best used for tracing - rice paper is semi-transparent so you can place it over a picture and trace it. You can then color it in using edible markers - or spread piping gel over the image very thinly and paint with straight food color. There are special techniques for using rice paper to make butterflies, flowers and leaves. Rice paper is not best to use for printing pictures, the texture on the paper makes the pictures fuzzy. Frosting sheets are sugar and starch based and the paper is attached to a paper backing sheet. These sheets are best for printing on. Some images, especially characters are available pre-printed. Non-copyrighted pictures or images can be printed using a special printer and edible inks.

Here are some instructions and ideas for using frosting sheets/edible images.

- Keep the image in the packaging, away from heat.
- Frosting sheets work best on white buttercream icing, it is designed to dissolve into the background. They can be used on tinted icings or chocolate icing, but it will take on the color of that icing.
- The frosting sheets work best when applied immediately after icing the cake. If the cake has formed a crust, mist the cake lightly with water before applying the image. No water spray is necessary if the icing has not crusted.

How to Use Frosting Sheets

1. Remove the design by gently rolling the back of the sheet over the edge of a table or counter to loosen. CAREFULLY PEEL the image away from its backing. If the image does not peel off easily from the backer, place the sheet in the freezer for a few minutes and try again.
2. Lay the frosting sheet in the desired position on the freshly iced cake. Once the image is on the icing, it can not be moved. GENTLY SMOOTH EDGES with your fingertips, as needed. If the image "bubbles" after application, GENTLY TAP (do not rub) the image.
3. You can write over or pipe additional decorations on the frosting sheet, just be careful not to push the decorating tip through the image.

Other Applications:

Royal Icing, Fondant, white chocolate, Ice Cream Cakes, cheesecake and pies!

We can print edible images on frosting sheets up to 8" x 10.5". We can scan the picture or we can use images off of the Internet. Each sheet is \$8.00 and includes scanning and file preparation for printing. Keep in mind that we can not print images that are copyrighted.

Recipe Swap — White Chocolate Popcorn

Ingredients

- 1 lb white chocolate
- 1 Tbsp Paramount Crystals
- 3 bags microwave popcorn (36 C popped corn)
- 2 C roasted, salted peanuts (optional)

Follow the directions to make the popcorn. Put popcorn in very large bowl, or on a baking sheet. Mix in peanuts if desired. Melt white chocolate—place chocolate in microwave safe container. Microwave on high for 30 seconds. Stir. Heat for 20 seconds. Stir. Repeat, heating for 15-second intervals until melted. Be careful not to overheat. Stir in paramount crystals. This thins the chocolate to make mixing and coating of the popcorn much easier. Drizzle white chocolate over popcorn and mix well. Put mixture on to parchment or wax paper to set. Best served within a few hours but can be kept overnight in an airtight container at room temperature.

I learned of this idea from a customer, and tried it for refreshments at the Cake Club meeting. No, this is for you!

We want YOUR recipes for cakes, cookies and/or candy that you are willing to share.

We will publish them in future newsletters. Send the recipes in by mail or email.

Capital Confectioners

That is the name for the new cake club!

There have been two meetings so far and we have been treated to three wonderful demonstrations. At the first meeting, Miss Janette demonstrated fondant techniques including coloring, rolling and covering a cake with fondant and then decorating with lace molds, crimping, impression designs and finishing with luster dust. At the second meeting there were two demonstrations. The first was conducted by Sallia Bandy who showed techniques to make a beautiful gumpaste rose using a 1 piece 5 petal cutter. She showed the techniques for assembling the rose, adding the calyx and then coloring and finishing. Achim Thiemermann demonstrated Silicone Plastique, a product that can be used to make molds. He discussed the types of materials that are best for making molds from and then demonstrated the techniques making a mold from a piece of jewelry.

The next meeting is set for Tuesday, February 11th at 7:00 pm at All in One Bake Shop. Gina Thieffo will demonstrate

basketweave variations in buttercream.

We have set Sunday, February 23rd as our first club event. We will meet at Miss Janette's (900A Rutland Austin, TX 78758) for demonstrations that will be presented from 1:00 pm to 6:00 pm. Some of the demonstrations will include: poured and pulled sugar, buttercream, fondant and gumpaste techniques. Call us at (512)371-3401 or check Club and Events at www.allinonebakeshop.com for details.

The meetings and the day of sharing are great opportunities to meet, network and socialize with others that share your same interests in sugar arts.

There are a variety of interests and skill levels represented in the members; from people who make cakes for family and have not had any classes, to cake hobbyists, to people who decorate for a living, to master decorators.

We can all learn from each other – that's what the Capital Confectioners is all about. Make plans to join us!
